luxury

Luxury goods are products that are not essential but are highly desired and associated with wealthy or affluent people. They are bought for several reasons: to support self-worth and status, or for the product's quality and craftsmanship.

luxurious

luxury is very expensive while luxurious is enjoying pleasures of luxury.

Harshyam Techno

Home lift
Improves the quality
of life,
every day.

We know every home is unique, and your home is a special place for you. You have picked every colour, every piece of furniture and every bit of decoration to create a home that is designed for your family, for your life and for your comfort.

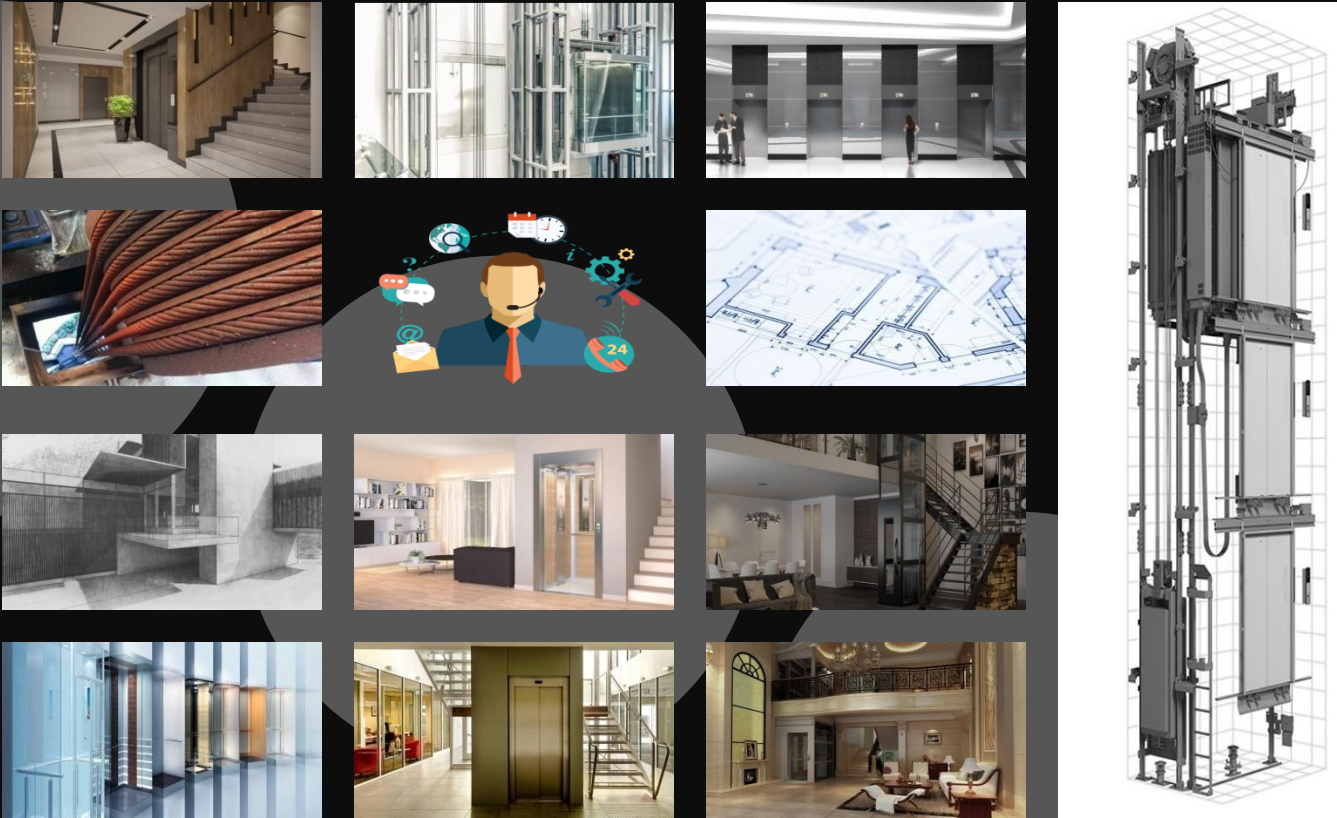

A home lift from Harshyam techno lift is designed to be that extra feature of your home.

It is decorative and is a spectacular design feature, which makes your home unique. It provides you with that extra feeling of luxury, and it ignites the full potential of your home.

The Design Wall in the lift has a luxurious and unique design. It is, by itself, a piece of art. The standard model is a rear-irradiated white wall of acrylic glass. But by choosing one of our carefully selected designs, you can really make a statement and express your personality. Our designs are picked from some prominent Scandinavian designers and artists. The options evolve over time.

Quality in every detail

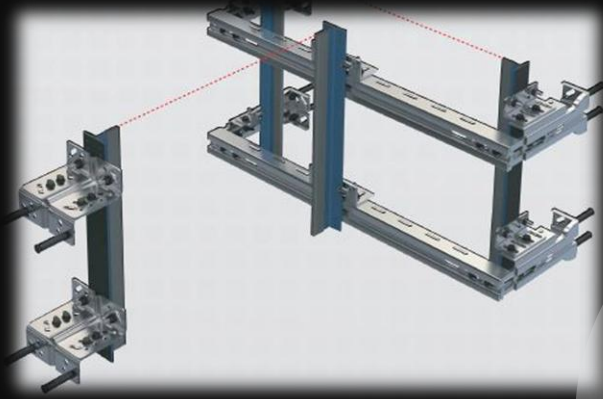

A high quality product is a lifetime investment. You can love it and use it every day, year after year, and it will just evolve with you throughout life. High quality is also timeless; the product will remain up-to-date while other trends come and go.

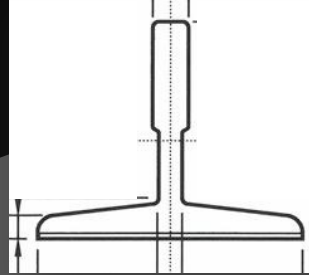

The Harshyam techno Home Lift is designed with turkey quality at its core. turkey has a heritage of recognized design, safe products and top quality. All of this is also true for the Harshyam techno Home Lift. By designing every detail with care, we have produced a product with a fantastic finish that is reliable and has a long lifetime. Harshyam techno Home Lift has one of the lowest maintenance costs on the market.

Harshyam Techno Home Lift

ENERGY EFFICIENCY

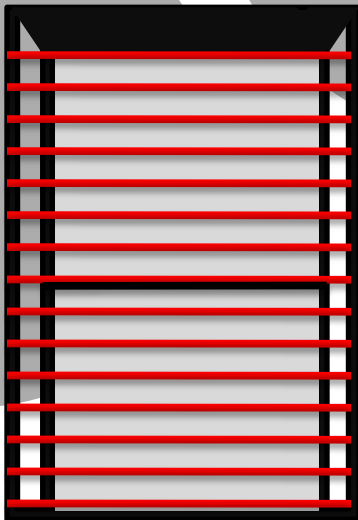

By adopting LED lighting for all ceiling designs, energy consumption is reduced and service life is prolonged compared with fluorescent lighting.

AUTOMATIC TURN-OFF OF CAR LIGHTING AND FAN

When the elevator is idle, the lighting and ventilation fan in the elevator are automatically turned off to conserve energy. Energy consumption is reduced by adopting led lighting for the ceiling and shortening the time until the lighting and fan turn off.

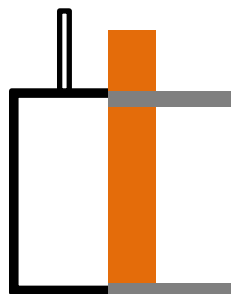

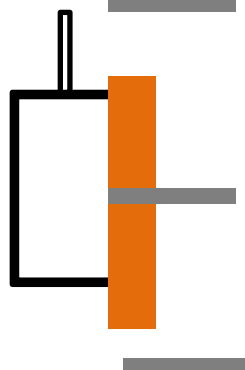

DOOR SIGNAL WITH MULTI-BEAM DOOR SENSOR

Door signal that Tells when the door is going to close for Enhanced safety, The door signal flashes to notify passengers When the door is starting to close

Automatic rescue device for power failure

When a power failure is detected, the drive power supply switches over to battery power, and the elevator automatically moves to the nearest floor and releases the passengers.

FUNCTIONS	
AUTOMATIC RETURN FUNCTION	Floor After all the calls have been served, the elevator will return to the stand by
INTELLIGNET OPERATION SECURITY	This function allows controlled access to certain floors by means of a password or other security system.
HOMING OPERATION	When a dedicated button is pressed, the other registered destinations are cancelled and the elevator goes directly to the specified floor. When it is necessary to use the elevator in an emergency.
INTERPHONE SYSTEM	An interphone system is provided for emergency communication between the elevator and the master unit in the supervisory panel, etc.
FLOOR LOCK-OUT OPERATION	Specific service floors can be locked –out by activating a switch
DOOR NUDGING OPERATION	When the door has been open for a certain period of time, a buzzer sounds and the door forcibly closes.
ABNORMAL SPEED PROTECTION FUNCTION	In the event that the elevator is moving downwards at an abnormally high speed, the brakes will be automatically engaged and the elevator will cease operation.
OUT OF DOOR – OPEN ZONE ALARM	In the event that the elevator stops out of the door-open zone of a selected floor, doors will not open, and an alarm will be sounded in the elevator.
RESCUE OPERATION	When the elevator stops out of the door-open zone, it will move to the nearest floor at slow speed to release passengers.
EMERGENCY BATTERY INDEPENDENT OPERATION	In the event of a power failure, this emergency supply allows the operation of a light, fan and alarm bell.
	For this system, the stop floor is manually set by an attendant, such as in a department store.

A piece of new art

STAND ON IT

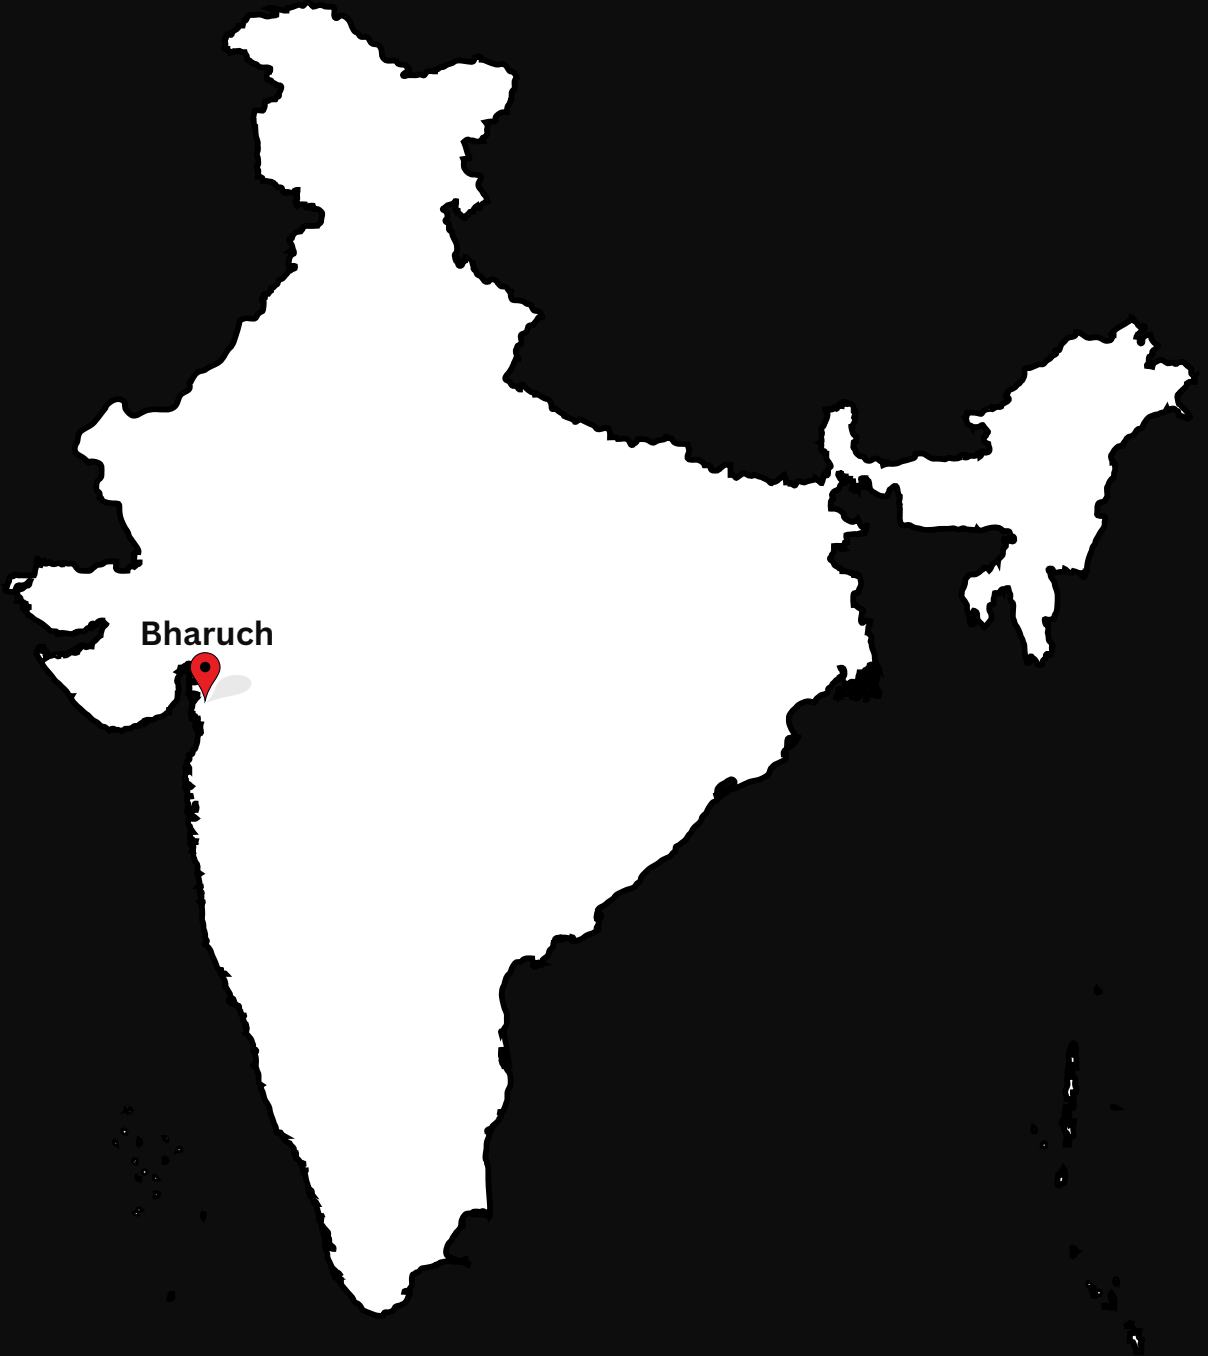

Our vision is to make home lifts a natural part of homeowners' lives. We want to redefine what a modern home is, making home lifts a must-have for all people striving for a contemporary way of life

Our journey started 5 years ago, with the simple idea of improving mobility everywhere. Simplicity, quality and innovation are the common basis of everything Harshyam Techno does.

We constantly seek new ways to improve, both when it comes to the product, environmental impact and quality, as well as the design and user friendliness.
